
Professional Summary

Results-driven Software Engineer with around 3 years of professional experience in designing and implementing scalable software solutions. Proficient in Java, Spring Boot, Microservices and AWS. Skilled in designing, developing, and deploying scalable, high-performance, and secure applications. Proficient in RESTful APIs, SQL databases. strong collaborator, adept in modern development methodologies, and passionate about solving complex problems with innovative solutions.

Core Competencies

- Programming Languages : Java, SQL
- Frameworks : Spring Boot , Spring MVC
- API Design : RESTful APIs, JPA
- Cloud Platforms : AWS (EC2, S3)
- Operating System: Linux, Windows
- Others : OOP's concept, Collection , Multithreading , Java 8 features , Exception handling ,Interface
- Database Management : MySQL
- Collaboration Tools : JIRA, Postman
- Build Tools : Maven
- Version Control Systems : Git, Bitbucket
- Architecture : Microservices

Professional Experience

Omfys Technology | Software Engineer

June 2025 – Present

- Client: ICICI Bank
Working on ICICI Bank HCM (Human Capital Management) platform and MCDF (Multi-Channel Digital Platform) for employee attendance and workforce management.
Developing and enhancing Banking APIs for critical modules such as Recruitment, Employee Allocation, Transfer, Leave Management, and Salary Processing.
Designed and implemented microservices architecture using Spring Boot, ensuring scalability, high performance, and security.
Built React.js components for interactive web interfaces, improving user experience and operational efficiency.
Integrated Oracle SQL database for backend data management and optimized complex queries for faster response times.
Worked closely with ICICI stakeholders to gather requirements, analyze business needs, and deliver secure, production-ready solutions.

CodeIcons Technology | Software Engineer

Aug 2023 – June 2025

- Developed proficiency in Java programming language through hands-on training and practical projects.
- Collaborated with senior engineers in the design, development, and implementation of software solutions using Java technologies.
- Acquired practical experience in Java frameworks, Spring Boot and Microservices architecture.
- Assisted in the creation of RESTful APIs and the integration of various software components.
- Gained knowledge in database management using SQL and MySQL.

Expert Global Solutions (An Alten Company) | Graduate Engineer Trainee

Sept 2022 – Jul 2023

- Developed and tested REST APIs using Java and Spring Boot to support functionalities for a Pipeline Integrity Management project.
- Collaborated with the team to design and implement dynamic forms for the Angular frontend, ensuring a user-friendly interface.
- Worked closely with senior developers to design and implement efficient solutions for application features.

Education

➤ Bachelor of Technology (CSE)	7.13/10	The Institution of Engineers	2018-2023
➤ Diploma in Computer Engineerin	77.06/100	Government polytechnic Jalna	2015- 2018

Projects

➤ ICICI Bank – HCM & MCDF Platform (Banking Domain)

- Developing ICICI Bank's **Human Capital Management (HCM)** and **MCDF** platforms to manage employee lifecycle processes such as recruitment, attendance, payroll, transfers, and leave management. Built and enhanced **Spring Boot microservices** for HR and banking modules, including recruitment, salary, leave, and transfers.
Developed **React.js dashboards** for employee self-service features like attendance tracking and leave requests.
- Optimized **Oracle SQL queries** and indexing for high-volume transactions.
- Deployed and monitored services on **oracle cloud** with load balancing to ensure **scalability, security, and 24/7 availability**.

- Collaborated with stakeholders to gather requirements and deliver production-ready solutions
- **OnlineBankingPortal(BankingDomain)**
 - Developed a secure and scalable web application tailored for Non-Resident Indian (NRI) and Person of Indian Origin (PIO) banking needs using Spring Boot, React.js, and Angular.
 - Enabled customers to open NRE (Non-Resident External) and NRO (Non-Resident Ordinary) accounts through the portal.
 - Collaborated with the UI/UX team to ensure a responsive and user-friendly interface across devices.
 - Followed microservices architecture, integrated RESTful APIs, and ensured backend scalability.
 - Technologies Used: Java, Spring Boot, Angular, MySQL, AWS (EC2, S3).
- **Pipeline Integrity Management System**
 - In this project, I focused on the backend development of a software platform that managed the integrity of oil and gas pipelines using diverse data sources.
 - Contributed to the development of the Pipeline Integrity Management System, focusing on backend development, using Spring Boot, and MySQL.
 - The application aimed to ensure the safety, reliability, and efficiency of pipelines while assisting surveyors in identifying potential threats and hazards.
 - Integrated data from multiple sources, including sensors and maintenance records, to identify potential threats such as corrosion, leaks, or structural damage.
 - Implemented JUnit test cases for developed REST APIs and validated them using Postman.
 - Technologies Used: Java, Spring Boot, Angular, MySQL, MongoDB, Bitbucket, Jira AWS (EC2, S3).
